Hi Ivan:

I wanted to commend you and your team on a job well done. As you know, over a year ago we contacted Vestra Inet to discuss a new web site. You took the time to visit Ferrier Wire, learn about our business and products, listen to our needs and presented a detailed and well thought out proposal. After we agreed to proceed, you and your team started working on the project right away. I enjoyed working with Evgenij, your photographer and image editor. It was fun to work with him and his excellent photographic and processing work was critical to the success of our website. Throughout the project, deadlines were met and anytime we had any questions or wanted changes made, they were attended to immediately. The project was finished on time, on budget and the quality of the end product is beyond what I had expected. We have since expanded our business with Vestra Inet to include SEO, an online database and have been equally happy with these products and services.

I would (and have) recommend you and Vestra Inet to other industrial and manufacturing organizations looking to improve their web sites and online presence. Please feel free to use us as a reference.

Kind regards,

Michael Wiebeck
President
Ferrier Wire Goods Company Ltd.
