RE: WEB DESIGN & IMPLEMENTATION

Dear Ivan:

After researching several web designers and obtaining quotations for a much needed upgrade to our old site, we are thrilled that we chose Vestralnet to handle our new website implementation. From the first meeting your teams professionalism and knowledge of website criteria has been insightful to say the least. We had originally intended to use another company – but after meeting you and seeing your qualifications – there is no question we are in good hands.

Your understanding and explanation of what your team could do for us as a manufacturer, and the ease in which we are able to handle updating of our site played a key role in the final decision making process. Your design team implemented all our wish list and more and we are set up to use additional modules in the future as we move to integrate our online shopping cart with internal software systems for automatic product updating on our site. **VESTRINET'S CUSTOMER SERVICE IS SECOND TO NONE!**

We were recently advised by a competing web integrator that our site is better than what they could have done for us! What else can be said? Bravo Vestralnet!

Thank you for your continued support before and after launch, and for taking the time to help us understand our SEO requirements going forward. We look forward to an ongoing relationship with your team as we continue to grow our business.

Best Regards,

Rolf Fabricius, P.Eng.
President
